Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 09 October 2001.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

Art Unit: 1723

1. Claims 9-14 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 9-14 have not been further treated on the merits.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 and 15-16 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,616,248 (hereinafter referred to as Schal). Schal teaches method and apparatus for preparing dialysis fluid comprising circulating water in a conduit (3, 16b), injecting into the conduit (16b) a first concentrated solution (14c1) of sodium and potassium at first concentration and injecting into the conduit (16b) a second concentrated solution (14c2) of sodium and potassium at second concentration different than the first concentration and regulating the injection flow rates of first and second concentration via pumps (15c1, 15c2) to form dialysis fluid of desired concentration of sodium and potassium wherein the flow rates are varied to vary the concentration of sodium or potassium over the course of time or holding the sum of flow rates constant such that concentration of sodium is held constant (see figure 6; col. 15, line 1 – col. 6, line 15).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1723

5. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over WO 95/08299 (hereinafter referred to as WO '299) in view of Schal. WO '299 teaches a liquid mixing assembly for mixing at least two liquids including a container divided into two separate compartments (4a, 4b) in side-by-side relation wherein each compartment contains one of dialysis liquids (see abstract; figure 1). Schal teaches dialysis fluid preparing concentrates comprising a first concentrated solution (14c1) of sodium and potassium at first concentration and a second concentrated solution (14c2) of sodium and potassium at second concentration different than the first concentration (see col. 15, line 51 – col. 2, line 15). It would have been obvious to a person of ordinary skill in the art to contain two concentrates of Schal in the each compartment of the container of WO '299 for facilitating the process of mixing and preparing desired dialysis fluid.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Kim whose telephone number is (703) 308-2350. The examiner can normally be reached on weekdays from 7:00 AM - 3:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda Walker, can be reached on (703) 308-0457. The fax phone number for official response after final action is (703) 872-9311, and the fax phone number for all other official faxes is (703) 872-9310.

When sending a draft amendment by fax, please mark the paper as "DRAFT"; otherwise, mark the paper "OFFICIAL". This will expedite the processing of the paper.
